

PHP Back End Website Developer:

The successful candidate will be likely to have a minimum of 5 years' experience in working with PHP code.

The ideal developer will be passionate about coding business systems and/or websites whilst solving challenges and delivering great results for clients.

You are likely to be self-managed, with an open mind – keen to learn and grow within the team. The role can be developed to suit an individual's strengths as we are growing and have varied projects to deliver.

Mandatory skills:

- An understanding and ability to write code without being reliant on frameworks and libraries
- PHP & MySQL
- Comprehensive testing process and an eye for detail
- Experience in setting up payment processors e.g. Stripe, PayPal, Sage, WorldPay
- Experience of working with 3rd party integrations, being able to write custom integrations if required
- Experience using Git
- Awareness of SEO and the importance of semantic HTML elements
- Experience with Hosting platforms such as cPanel/Plesk

Desirable skills:

The ability to communicate the technicalities of projects to non-technical clients, giving them the confidence that you understand their brief and will deliver a great return for their investment.

Key duties and responsibilities include:

- Ongoing maintenance of the many websites in our current portfolio
- Planning new websites with the senior website developer
- Testing new development work thoroughly
- Keeping up-to-date with latest technologies / services / trends
- Open-minded attitude to adopt new practices
- Ensuring our websites comply with Google's best practices

Working hours:

Monday to Friday 9am to 5pm.

Salary

£25-35k DOE.
